10 years of professional experience, including 2+ years as Full-Stack Web Developer. Skilled in database creation with front-end/back-end integration. Proficient in setting up IDEs. Actively gaining skill in object oriented design patterns, new industries best practices, refactor projects to newer version releases, leading the design, troubleshooting/debugging, and the launch of all applications below.

TECHNICAL SKILLS

Softwares/Platforms: Django, Laravel, React, NoSQL, MySQL, MongoDB, AWS, Oracle, Git, JQuery, Node, Handlebars, Angular

Software Languages: ES6, JavaScript, Python, Java, C#, HTML5, CSS, C++, Go

PROJECTS

taco-stand | github.com/wilmer88/taco-stand | <https://taco-stand.herokuapp.com>

- Provides a platform for businesses to sell their products where customers can pre-order and make online payments, eliminating wait time for both ordering and preparation. Eliminates the need for manual order taking and payment processing, and also speeds up the order delivery process as paid orders are immediately available to kitchen staff.
- Developed and launched application from concept to completion. Solely responsible for creating and designing all features, writing and debugging all source code.
- Technologies: React/JSX, React Router, Express, Node, MongoDB, Bulma, ES6, Bcrypt, JWT, Mongoose, Axios, Stripe Checkout, JSON Web Token and more, please see dependencies.

web-Inventory | github.com/wilmer88/tool-inventory | <https://tool-inventory.herokuapp.com>

- Developed application to be used with mobile devices to simplify documentation, organization, improved look up speed, and count availability. Stores in a database items location, count, specification and accountable employee name.
- Responsible for leading the development of the application, including writing all source code, designing the user interface, testing of features, and ensuring a successful launch.
- Built with Foundation CSS, Handlebars, HTML, JawsDB, Node, MySQL and Sequelize.

ga_dev | github.com/wilmer88/err-help | <https://ga-devs1.herokuapp.com>

- Full CRUD application where jr developers can post their computer errors, and solutions to a live database. Works perfect on desktop with mobile responsiveness; future development is still to be decided.
- Lone creator of both back-end and front-end code, including tabs, view pages and button functionalities. Switching database provider from AWS to Heroku PostgreSQL.
- Technology used: Bootstrap, Django/Python, SQLite3, PostgreSQL, AWS, and Heroku.

EXPERIENCE

Owner

2020 – Present

Coat & Code LLC

Rome, Ga

Determine job bid prices, negotiate, analyze counter offers to ensure fair market value for client and Coat & Code. Communicating job needs, scheduling and managing. Increasing client satisfaction and delivering the highest quality product possible.

Generalist

2013 – 2020

MCC LLC

Rome, GA

Pipeline maintenance tasks, driving company vehicles and paperwork. Relay of crew's issues, the needs of materials, tools, equipment; and purchasing them. A rewarding moment- Company client went out of their way to write a handwritten letter to the project manager on how impressed they were of our work and going above and beyond expectations.

EDUCATION**Georgia Institute of Technology: Atlanta, GA**

2020

Graduate of an intensive comprehensive Full Stack Flex Web Development program that covers both frontend and backend web development skills, industry best practices, database creation and connection, legacy code maintenance, API architecture, test driven development, building PWA for improved web performance, and much more.
